

EURO-V-7U-L

Euro-V

7U

Le rack mobile Euro-V Rack Case est un rack rotomoulé à finition lisse, équipé d'un chassis standard EIA de 19" avec des profondeurs de 610 mm et 760 mm, conçu pour accueillir des équipements montés au format métrique via un système de trous carrés standard (M6).

Lightweight yet durable, the Euro-V Rack Case offers intermediate protection in a compact format. Designed for rapid deployments, it features integrated cylindrical shock absorbers fixed directly to the case walls, providing effective resistance against impacts and vibrations. Its stackable design makes it fully compatible with 19" Peli Super-V and Peli BlackBox racks, ensuring a smooth integration into mixed fleets.

Manufactured in Germany for fast delivery times, the Euro-V is available in nine sizes (from 4U to 10U), all featuring ribbed, injection-molded walls, lateral casters, and an acier frame - ready for use upon arrival.

The Euro-V Rack Case is ideal for critical applications requiring reliable protection in a lighter and more compact format. When sensitive equipment must arrive intact and on time, the Euro-V Rack Case is the choice to make.

DIMENSIONS

EXTÉRIEUR	45.00 x 24.68" x 18.81 (114.3 x 62.7 x 47.8 cm)
Hauteur de châssis	19.00" (48.3 cm)
longueur de châssis	30.00" (76.2 cm)
intérieur profondeur du couvercle	19.69" (50 cm)
intérieur arrière profondeur du couvercle	4.72" (12 cm)
